— GOALS

With over ten years of experience in software development at Graphisoft, I have decided to focus my expertise on frontend development, driven by my passion for creating impressive websites. My goal is to solve problems with creative solutions, inspiring and encouraging my peers to think in new ways and dare to create something extraordinary.

— STRENGTH

- Excellent communication and teamwork skills
- Flexible attitude and quick learning ability
- Creative, initiative-taking, idea-generating team player characteristics
- Broad-minded problem-solving and understanding the big picture
- Project management experience, effective team coordination

— EXPERIENCE

Career Transition

Front-End Engineer Career Path, Codecademy course
2024

Conscious preparation for starting my career in web development, completing courses.

Senior Software Engineer, Council/Guild Lead

GRAPHISOFT, Budapest
2021 - 2023

Beside senior developer tasks, I was the leader of the GDL codebase and technology guild and council.

Senior Software Engineer

GRAPHISOFT, Budapest
2021

After transitioning to an agile system I operated as a competency center within a squad. Actively participated in a large-scale architectural transformation of a million-line codebase.

Parental Leave, Learning WebDesign

Pixelgyár Online Webdesign Course, Budapest
2019 - 2021

Active acquaintance with frontend web development.

Medior Software Engineer

GRAPHISOFT, Budapest
2017 - 2018

Participation in minor projects related to ArchiCAD library elements.

Parental Leave, Freelance Architect

Freelance, Budapest
2015 - 2016

Drawing architectural plans.

Junior/Medior Software Engineer

GRAPHISOFT, Budapest
2007 - 2015

First encounter with software development, creating and maintaining GDL parameterized library objects in collaboration with a team of 80-100 developers, specifically C++ developers, within the Library team for the ArchiCAD architectural program.

— STUDIES

Intermediate JavaScript Course

Parts of Front-End Carrer Path, Codecademy
2024

Learning classes, inheritance, modules, async programming, API calls, error handling, concurrency

Front-End Engineer Career Path Course

Codecademy
2023 - Present

HTML, CSS, and JavaScript, to frameworks like React and Redux, to interview skills, like whiteboarding and data structures

Web Design Course

PIXELGYÁR, Budapest
2020-2021

Completed intensive web design training covering web graphics to frontend coding.

Architectural Engineering

BUDAPEST UNIVERSITY OF TECHNOLOGY AND ECONOMICS, Budapest
2001-2009

I honed my skills in architectural design, project management, and compliance with building regulations
